

# Instructions on how to put photos onto your wiki

You will need:

- \*Computer
- \*Camera
- \*Chord for camera or memory stick from inside camera

1 Turn on computer

2 Get memory stick out of camera/or get your chord

and plug into computer(Iphoto should automatically come up)

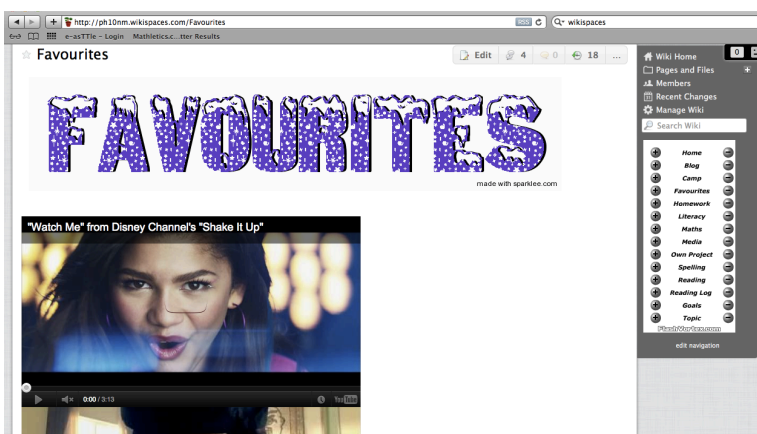

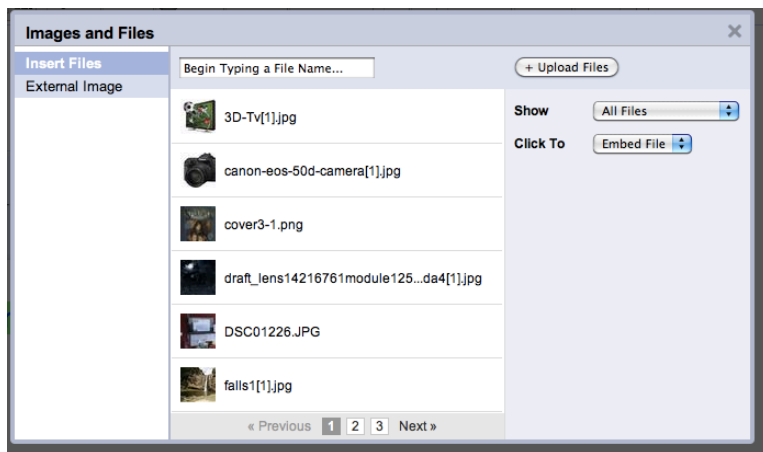

3 Choose your photo.

4 Drag your picture onto the desktop

5 Log onto your wiki and choose what page to do it on

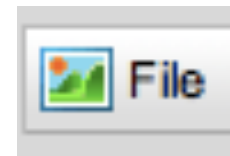

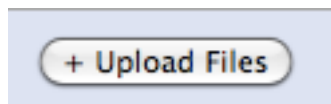

6 Click on the edit button.

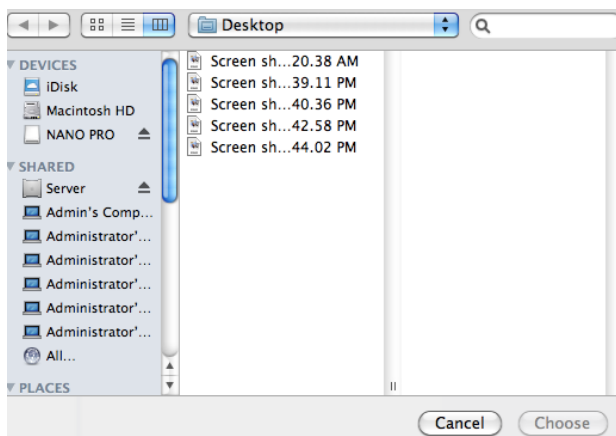

7 Click on File up the top

8 Click on the button upload files

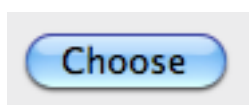

It should look like this

9 Find the photo you dragged onto the desktop and click it

10 Press choose and wait for it to load

11 Click on your photo (it should come up on your wiki)

12. Drag it where you want it to go and click save
